

RITHESH NK

nkritesh@gmail.com | [linkedin.com/in/ritheshnk](https://www.linkedin.com/in/ritheshnk) | github.com/ritheshnk | ritheshnk | Bengaluru, India

Professional Summary

Java Software Engineer with **3 years of experience** building secure backend systems and enterprise banking applications. Experienced in **Spring Boot, Spring AI (RAG, ChatClient), Spring Security, and Azure DevOps**, with a background in SDET and a strong focus on production-ready, maintainable services.

Key Achievements

- **Promoted twice within 18 months** at Cigniti Technologies based on consistent delivery and technical leadership.
- Contributed to **production REST APIs** for Northern Trust's Web Cash Movement platform serving enterprise-scale banking transactions.
- Integrated **Spring AI with Azure OpenAI** (ChatClient, PromptTemplate, RAG pipeline with Vector DB) into live banking workflows.
- Built end-to-end automation frameworks from scratch, reducing **manual testing effort by 60%** and achieving **80%+ test coverage**.

Experience

Backend Engineer

May 2025 – Present

Coforge / Bengaluru, India | Client: Northern Trust – Web Cash Movement Project

- Contributed to Spring Boot REST APIs for Northern Trust's cash movement platform; implemented **JPA/Hibernate with MySQL**, including relational schema design, SQL joins, and transaction management for payment workflows.
- Integrated **Spring AI with Azure OpenAI** using ChatClient and PromptTemplate to build intelligent payment recommendation services; implemented a **RAG pipeline with Vector DB** for context-aware query responses.
- Secured API endpoints using **Spring Security with JWT** (token issuance and validation) and **role-based access control (RBAC)**; documented all endpoints with **Swagger/OpenAPI**.
- Configured and maintained **Azure DevOps CI/CD pipelines** – containerised services with **Docker**, published images to **Azure Container Registry**, and deployed to **Azure App Service**.
- Applied **SOLID principles and Builder pattern** across service layers using **Lombok and Maven**; wrote unit tests with **JUnit 5 and Mockito** and participated in Git-based code reviews.

Software Engineer – SDET

Dec 2024 – May 2025

Cigniti Technologies / Hyderabad, India | Client: Northern Trust – Web Cash Movement Project

- **Promoted from Associate Engineer** after exceeding delivery targets; led design of scalable automation frameworks using **Java, Selenium WebDriver, and TestNG**.
- Achieved **80%+ test automation coverage** for Northern Trust's web platform using **data-driven and BDD (Cucumber/Gherkin)** strategies, cutting regression cycle time significantly.
- Mentored 4+ junior and senior engineers on framework design and clean code practices, reducing onboarding time and increasing team velocity.

Associate Engineer – SDET

May 2024 – Dec 2024

Cigniti Technologies / Hyderabad, India | Client: Northern Trust – Web Cash Movement Project

- Built maintainable automated test suites achieving **80%+ coverage** across functional, regression, and integration layers using **Java and REST Assured**.
- Surfaced and resolved critical defects through early-lifecycle collaboration with development teams, reducing production incidents.

Trainee Software Engineer

Nov 2023 – May 2024

Cigniti Technologies / Hyderabad, India

- Authored automated test scripts in **Java and Selenium WebDriver**; executed manual and automated test cases with full defect documentation and tracking.
- Participated in agile ceremonies – sprint planning, standups, and retrospectives – gaining end-to-end software delivery exposure.

Technical Skills

Languages	Java (primary), SQL, JavaScript
Backend	Spring Boot, Spring Security (JWT/RBAC), Spring Data JPA, Hibernate, Maven, Lombok, Jackson, Swagger/OpenAPI
AI / LLM	Spring AI, Azure OpenAI, ChatClient, PromptTemplate, RAG, Vector DB
Databases	MySQL, PostgreSQL, H2 (testing), JPA/Hibernate, schema design, SQL joins, transactions
Cloud & DevOps	Azure DevOps Pipelines, Azure App Service, Azure Container Registry, Docker, Git
Testing	JUnit 5, Mockito, Selenium WebDriver, TestNG, Cucumber, Gherkin, REST Assured
Concepts	SOLID Principles, Layered Architecture, DTO Mapping, Global Exception Handling, REST Best Practices, Dependency Injection, Agile/Scrum
Frontend	React, JavaScript, HTML5, CSS3

Projects

RideWise | *Ride Fare Aggregator – Spring Boot + React*

github.com/ritheshnk/ridewise

- Built a **Spring Boot REST API** with layered architecture (Controller, Service, Repository), Haversine-based distance calculation, and a dynamic pricing engine aggregating fares from Uber, Ola, Rapido, Namma Yatri, and InDrive.
- Applied **Spring Boot Caching** (@Cacheable, @CacheEvict), **Lombok** models, global exception handling, input validation, and **Swagger/OpenAPI** documentation for production-ready API design.
- Building a **React** frontend with Google Maps Autocomplete and deep-link booking; containerised with **Docker** for local development.

Coders Gym | *SaaS Gym Management Backend – Spring Boot + PostgreSQL*

github.com/ritheshnk/codersgym

- Designed a **Spring Boot** backend with **JWT authentication (Spring Security)**, role-based access control, trainer booking system, and **Razorpay payment gateway** integration.
- Designed relational schema with **PostgreSQL and Spring JDBC**; applied DTO mapping, service-layer separation, and **Maven** build management.

Education & Certification

B.E. in Computer Science

Aug 2019 – May 2023

A.J. Institute of Engineering & Technology, Mangaluru, Karnataka, India

Microsoft Certified: Azure Fundamentals (AZ-900)
